LINKEDIN MONETIZATION PLAYBOOK

For The Beholder Project

A 90-day launch plan for revenue
from AI research, filmmaking tools, and philosophical thought leadership

August 2026

August 2026

Companion document to The Beholder Project (Volumes I–III)

LinkedIn Monetization Playbook

For The Beholder Project — August 2026

YOUR POSITIONING

You are the **AI Philosopher-Practitioner**. Almost no one occupies this niche on LinkedIn. Your audience: 53% earn $100K+/year. 80% of all B2B social leads come from LinkedIn. 63 million decision-makers actively seek AI expertise.

Your unique edge: rigorous AI research + working AI filmmaking tools + philosophical depth. Most AI content on LinkedIn is either pure hype or pure code. You have neither. You have a framework, a toolkit that works on free GPUs, and a philosophical position that no one else is making.

PROFILE SETUP (Do this first — 30 minutes)

Headline (120 chars max, most important line on your profile): ``` AI Research Frameworks | Beyond Parameter Scaling | AI Filmmaking | The Beholder Project ```

About section (first 3 lines visible before "see more"): ``` I build things at the intersection of machine intelligence, creative production, and the philosophy of creation.

Author of Beyond Parameter Scaling — a first-principles research framework arguing that AI intelligence scales across more dimensions than parameter count alone. Creator of GODSHAND — an AI filmmaking toolkit that renders cinematic films on free Kaggle GPUs.

Currently exploring: Can a creation exceed its creator? ```

Featured section (pin these 5 items in order): 1. Volume I PDF — "Beyond Parameter Scaling" (uploaded as document) 2. GODSHAND Case Study — the before/after render comparison 3. A carousel: "9 Propositions That Challenge the Scaling Laws" 4. Volume III excerpt — the Ramanujan chapter (philosophical hook) 5. Link to your Gumroad/product page for the GODSHAND toolkit

Services page:

- AI Strategy Consulting
- AI Filmmaking Workshops
- Thought Leadership Advisory

Creator Mode: Enable. Add hashtags:

#ArtificialIntelligence #AIStrategy #Filmmaking #Philosophy #ThoughtLeadership

CONTENT ENGINE (Weekly — 4 posts + 1 newsletter)

Monday — Text Post (Framework insight)

Short, punchy, one idea from Volume I. 900–1,600 characters. First 2 lines must hook before the "see more" fold.

Example: ``` Everyone thinks AI intelligence = parameter count.

That's like saying human intelligence = number of neurons.

Parameter count is one axis. Here are the other 8 that matter:

→ Abstraction depth (vertical scaling) → Population interaction (horizontal scaling) → Evolutionary generations (temporal scaling) → Knowledge access → Perception and embodiment → Validation and selection → Environment richness → Inference-time computation

The question isn't "how big is the model?" It's "what kind of ecology is the model embedded in?"

That's the thesis of Beyond Parameter Scaling. Full framework in the comments. ```

Rules:

- Never put links in the post body. Links in first comment.
- End with a question to drive comments.
- Reply to every comment within the first hour.

Wednesday — Document Carousel (Visual framework)

Upload as PDF → LinkedIn converts to swipeable slides. 8–12 slides. 1080×1350px. This is your highest-reach format (2–3x multiplier).

Carousel ideas:

- "The 9 Propositions" — one per slide
- "P4: Why Contradiction Makes AI Smarter" — visual argument
- "C0 to C9: The 10 Conditions of AI Intelligence" — experimental design
- "Monolith vs. Ecology" — the control experiment explained
- "The GODSHAND Architecture" — how to render a film on $0

Friday — Video (60–90 seconds, smartphone)

Talking head or screen recording. Always include captions. Topics alternate between:

- AI research insight (from Volume I)
- AI filmmaking demo (GODSHAND in action)
- Philosophical question (from Volume III)

Video generates 7x more reactions and 24x more comments via LinkedIn Live. Start with recorded video, graduate to Live when you have an audience.

Bi-weekly Sunday — Newsletter

Name: **"Beyond the Parameter"** or **"The Scaling Report"**

Bi-weekly, 800–1,500 words. Deep dives that regular posts can't hold.

First 8 editions: 1. "Why Intelligence Is Not One-Dimensional" (P1 deep dive) 2. "The Case for Contradiction-Preserving AI" (P4 formal grounding) 3. "How AlphaEvolve Changed Everything" (evolutionary discovery) 4. "Rendering Cinema on Free GPUs: The GODSHAND Story" 5. "When the Action Does You: Flow States and AI" (from Volume III) 6. "The Joker as a Model for Autonomous AI" (Creator/Creation bridge) 7. "Why Analogy Is AI's Most Undervalued Capability" (P3) 8. "The Experiment We Need to Run" (C0–C9 program)

Monetize the newsletter:

- Free tier builds audience
- Paid tier ($5/month) unlocks deep research, early access, Q&A
- At 1,000 engaged subscribers → introduce paid tier

REVENUE STREAMS (Priority order)

1. GODSHAND Toolkit Sales — $99–$199

Immediate revenue. Product is ready.

Post a 90-second demo video. Pin the link in comments. Create a carousel: "How to Render a 26-Shot Film on Free Kaggle GPUs." Share the case study as a document post.

Funnel: Free content → curiosity → demo → purchase.

2. Consulting / Advisory — $200–$500/hr

Highest per-hour revenue.

Your Services Page + Articles + Featured content attract inbound leads. When a decision-maker engages with your framework post, send a personalized DM (not a pitch — start a conversation about their AI challenge).

First 3 clients from warm network. Scale from there.

3. LinkedIn Learning Course — $10K–$100K+/year

Long-term recurring revenue.

Pitch: "Beyond Parameter Scaling: A Framework for AI Intelligence" or "AI Filmmaking: From Script to Screen with Free Tools."

Apply through LinkedIn Learning's instructor program. Your newsletter + content performance is your audition tape.

4. Speaking Engagements — $5K–$50K per event

High-margin, credibility-building.

Video content + thought leadership = 5x more speaking invitations. Target: AI conferences, film tech events, philosophy of technology panels. Your three-volume project is a unique credential.

5. Newsletter Sponsorships — $500–$5,000 per edition

Once you have 5,000+ subscribers.

AI tool companies, cloud GPU providers, filmmaking software brands will pay to reach your niche audience.

6. Book Sales — $14.99–$49.99

Use LinkedIn as primary promotion channel.

Upload Volume I as a featured document. Post chapter excerpts as Articles. Create a carousel of the key diagrams. Drive to Amazon KDP link in comments.

90-DAY LAUNCH PLAN

Month 1 — Foundation

- [ ] Optimize profile (headline, About, Featured, Services Page)
- [ ] Enable Creator Mode, add hashtags
- [ ] Publish 3 text posts/week + 1 carousel/week
- [ ] Launch newsletter (first 4 editions planned)
- [ ] Upload Volume I PDF to Featured section

- [ ] Set up Gumroad page for GODSHAND toolkit
- [ ] Engage with 10+ posts daily in AI/filmmaking niches

Month 2 — Growth

- [ ] Add 1 video/week (60–90 seconds)
- [ ] Publish first deep-dive LinkedIn Article
- [ ] First LinkedIn Live: GODSHAND demo
- [ ] Invite 50 targeted connections to newsletter
- [ ] Begin tracking post performance metrics
- [ ] First consulting inquiry via Services Page

Month 3 — Monetization

- [ ] Launch paid newsletter tier ($5/month)
- [ ] Reach out to 5 potential consulting clients via warm DMs
- [ ] Pitch LinkedIn Learning course
- [ ] Apply for BrandLink / Thought Leader Ads
- [ ] Document performance for Creator Fund eligibility
- [ ] First speaking inquiry or podcast invitation

THE GOLDEN RULES

1. **Never put links in post body.** Links in first comment. Posts with links get ~50% less reach. 2. **Reply to every comment in the first hour.** Engagement velocity drives distribution. 3. **80/20 value-to-promotion.** Four posts of pure value for every one that sells something. 4. **Consistency over intensity.** 3 posts/week for 6 months beats 10 posts/week for 2 weeks. 5. **Engagement rate > follower count.** 12K followers at 6% engagement is worth more than 80K at 0.4%. 6. **Lean into video.** Every monetization program LinkedIn is building favors video creators. 7. **Document your process.** "I rendered a 26-shot film on free GPUs — here's what broke" is more engaging than "My toolkit is great." 8. **Own your niche.** You are the AI philosopher-practitioner. No one else is making this argument. That is your moat.

WHAT TO POST THIS WEEK

Monday: "Everyone thinks AI intelligence = parameter count. That's like saying human intelligence = number of neurons." (Text post, hook from Volume I)

Wednesday: "The 9 Propositions" carousel (8 slides, one proposition per slide, last slide = link to full framework in comments)

Friday: 60-second video — "I built an AI filmmaking toolkit that renders on free GPUs. Here's what it produced." (Screen recording of the Confrontation clip or Plastic Hearts scene)

Sunday: Newsletter #1 — "Why Intelligence Is Not One-Dimensional" (adapted from P1 chapter of Volume I, 1,200 words)

Link in every comment: "Full framework → [Gumroad/KDP link]"
